

Project Design Phase-I
Solution Architecture

Date	01 October 2022
Team ID	PNT2022TMID26452
Project Name	Personal expense tracker Application
Maximum Marks	4 Marks

Team Members:

- 1) Suriya MS (Leader)
- 2) Ruhit Krishnan M
- 3) Saran T
- 4) Thamizhchelvan R

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
