Expertization and Solution fit

VALUE INSIGHT

Shows purchase rate comparison for the products available in the market	Monthly graph of the amount being saved and amount being wasted	Compares the ratio of credit and debit

SEAMLESS INTEGRETIY

Helps in tracking all the modes of payment done	Reads payment invoice and transaction receipt of all the transaction made	Projects warning notice for over spending	Annual rewards for the customers

- Tracking income and expenses: Monitoring the income and tracking all expenditures (through bank accounts, mobile wallets, and credit & debit cards).

- Transaction Receipts: Capture and organize your payment receipts to keep track of your expenditure.

- Payments & Invoices: Accept and pay from credit cards, debit cards, net banking, mobile wallets, and bank transfers, and track the status of your invoices and bills in the mobile app itself. Also, the tracking app sends reminders for payments and automatically matches the payments with invoices.

- Reports: The expense tracking app generates and sends reports to give a detailed insight about profits, losses, budgets, income, balance sheets, etc.,

- E-commerce integration: Integrate your expense tracking app with your eCommerce store and track your sales through payments received via multiple payment methods.

- Vendors and Contractors: Manage and track all the payments to the vendors and contractors added to the mobile app.

- Access control: Increase your team productivity by providing access control to particular users through custom permissions.

- In-depth insights and analytics: Provides in-built tools to generate reports with easy-to-understand visuals and graphics to gain insights about the performance of your business.

- Budget Vs. Actual Spent: This is one of the most common features in an expense tracking mobile app. The user gets a detailed insight into the real-time income and expenditure. Thus, you can plan your budget strategically to reduce unnecessary expenses.
